Response to Office Action mailed 11/10/05

Please amend the Specification according to the following marked up paragraphs.

[0014] A hearing aid device comprises, as a rule, one or ~~one~~ more input transducers to acquire an input signal. The input transducer is, for example,
5 fashioned as a microphone that acquires an acoustic signal and transduces it into an electrical signal. However, units that comprise a coil or an antenna and that acquire an electromagnetic signal and convert it into an electrical signal are also used as an input transducer~~are~~.
